SPECIFIC EXPERIENCE RELEVANT TO THE DEVELOPMENT ADVISER ROLE

Development of Personal Development Plans

My involvement with Postgraduate tutor ship with London Deanery Charing Cross Postgraduate centre has helped me to gain experience as a lecturer, and mentoring.

My involvement with NW Thames Division of the former Faculty of General Dental Practitioners (Now College of Dentistry), has provided a platform to work like minded colleagues to organise courses and under that banner lecture and run study groups at post graduate centre.

Development Adviser

My experience as a Dento-legal adviser, examiner and a tutor has given me the insight in the dental field and reasons for the difficulties faced by Dental colleagues. This has assisted me to guide them to improve their practices and fulfil the conditions set by the Regulatory bodies

Knowledge of development tools to increase insight and self-awareness.

My Training with Dale Carnegie has been useful to deal with the many aspects of personal development – Increase self-confidence, understand their problems, and help individuals to gain insight.

Knowledge of relevant workplace-based assessments, e.g., audit, case-based discussion.

During my involvement with an indemnity provider, I have made many visits to various dental practices to assist them to refine their protocols and conduct audits in all aspects of the practice and demonstrate the progress with continuous audits as part of the remediation programme.

Knowledge of current standards and guidelines in dentistry.

Being a wet fingered dentist, it is a basic requirement to be aware of the current standards and guidelines in Dentistry.

In all my other activities e.g. -Associate Dento-legal adviser, post-graduate dental tutor and currently and examiner (ORE) has required me to have up to date information about the regulations

Knowledge of the GDC fitness to practise process

Recently appointed as case assessor and having training as expert witness by the General Dental Council (GDC) and having and as an associate Dento-legal Adviser for Dental Protection and assisting members in their cases at the General dental Council, it was a necessity to know the process to help the members and carry out their remediation programme.

Report writing skills.

I have completed the basic report writing course of Bond Solon. Submitted many reports for members to the Indemnity provider and GDC as a reporter of progress by the member.

Equality, diversity, and inclusion policies.

It is imperative for me to be well versed with Equality and Diversity as an Examiner, Tutor and a dento-legal Adviser. I regularly attend and obtain CPD..

Effective communications skills.

Dale Carnegie courses and the training in public speaking has helped me to develop confidence to convey my points, negotiate and lecture to audiences whilst running the courses.

Motivating and developing others.

Mentoring training and Dale Carnegie courses based on the best seller confidence book "how to win friends and influence people" has been a tremendous influence in my life. Mentoring training provided by the London Deanery to the Tutors has helped in motivating dentists.

Good interpersonal skills.

Again, all the organisations that I have belonged to needed to have good people skills. As President of the Lions Club of Southgate (an international Charity organisation), it was necessary to lead and get people on board to donate money for good public causes.
